

# Grow your Business and Stay Ahead of the Competition with Microsoft Dynamics NAV 2015

Microsoft Dynamics NAV is designed to empower your people to be more productive and your systems to last longer, with the ability to scale to accommodate growth, while delivering the insight you need to respond quickly in an ever-changing world of business.

## Simple to learn and use

Simplicity is at the core of Microsoft Dynamics NAV. It is easy to learn and use because it works with other familiar Microsoft technologies, such as Microsoft Office. And Microsoft Dynamics NAV works the way you work, so it's easier for you and your employees to make better decisions and get more done. Simplicity is built into every aspect of your experience – from initial purchase and deployment to ongoing maintenance and upgrades.

## Delivers Agility in the Face of Rapid Change

Today's business landscape is changing at an ever-increasing pace. To stay ahead, you need a business management solution that is designed to help you meet evolving demands. Microsoft Dynamics NAV delivers the agility you need to adapt new business processes and extend functionality quickly, making it easier to enter new markets, add capabilities, or re-allocate existing investments. In addition, you can use cloud-base hosting for Microsoft Dynamics NAV to give you flexibility to expand or contract as business conditions change.

## Drives Value for Your Business

Microsoft Dynamics NAV delivers value for your business in three important ways. First, you can increase your return on investment (ROI) as you boost productivity and create new ways to control expenses helping to drive profitability. Second, Microsoft Dynamics NAV offers interoperability with the other technologies you already use in your organization to help lower your total cost of ownership (TCO). Finally, you can achieve maximum benefit from your technology investment through improved time to value, especially when you don't want or need an extensive IT infrastructure.

Whether you choose an on-premises or hosted deployment model, **Wizardsgroup** can get you up and running quickly with tools to accelerate installation, set up and extend core functionality and migrate data from your legacy systems.

**Wizardsgroup, Inc.**, a Microsoft Gold Partner with proven track record in delivering Microsoft Dynamics NAV solution to various manufacturing and distribution companies in the Philippines provides this business management solution for small and mid-sized organizations.
